We have garnered the maximum support of customers by manufacturing, exporting, supplying and trading a precisely constructed array of Power Inductor, Line Filter and more. Our products are available in different specifications.

## About Us

"METRONIX" an **ISO 9001:2008 Certified Company**, are the pioneers and leading manufacturers in the field of Magnetics with more than two decades of experience and are well equipped with state of the art machines, tools and equipment to maintain high quality in various sectors of operations. We have well trained and highly skilled manpower to maintain high standard of efficiency and devotion aiming at maximization of productivity. They are systematically and continually imparted in-service training to update their skills consistent with changing technologies and latest trends. We also assist our customers in design and development of magnetics in order to achieve high reliability in their end products. Apart from this, we have effective system of supervision at various levels of operation to bring in the value added products. The high degree of quality control is maintained and monitored by our well-equipped quality control management system, which constantly strives for high quality products at competitive rates. We have well programmed computerized system to test various parameters of the component at various processes with high degree of precision leading to less scope for rejections. With strong inventory base and with high-grade inputs our products are rated high in the industry. We activities, which among others things, include high quality on information reporting, feedback and data processing system, good work environment effective research...
