About Us

Knowledge, technical innovation and teamwork are at the center of who we are. For more than 80 years, we have focused on leveraging these assets to deliver solutions that improve customer performance. Today, our real-time technology services and solutions enable customers to translate acquired data into useful information, then transform this information into knowledge for improved decision making-anytime, anywhere. Harnessing information technology in this way offers enormous opportunities to enhance efficiency and productivity. This is a quantum leap from providing traditional 'just-in-case' information to delivering 'just-in-time' knowledge that meets the changing needs of our customers.
