About Us

Inception and First Footprints... Microcon Instruments and Systems - MISL (precursor of Microcon i2i) was founded in 1983. The Founder & Mentor Mr. Ravi Narayanan, is a visionary and veteran entrepreneur with vast experience in the areas of Electronics, Aerospace and IT. He is a renowned consultant in the field of automation, controls and testing and has more than 100 installations designed by him to his credit. Microcon made a modest beginning in 1983 and was a pioneer in providing control and automation solutions to industry that bridged the gap between Electronics, Mechanical and Instrumentation that existed in those early days. It primarily operated as one-man show till 1988 and offered design, consultancy and manufacturing co-ordination services and executed over 100 projects in its first five years. **Expansion and Diversification...** From 1989 onwards the company expanded gradually in terms of people, space, projects handled and technology. The main focus areas were Testing including solutions for ATE, test rigs, down to testability analysis; embedded systems development and Windows based software development. To strengthen its position as a Technology Solution provider, Microcon tied-up with several market and technology leaders in these areas such as Siemens for Controls and Automation and Racal for ATE solutions. Our customers ranged from Automobile ancillary companies, to Tube Mills, and other discrete manufacturing industries to...
