About Us

About Us The pioneer in Aquaculture industry to provide health care products
MICROL REMEDIES is a house hold name among aquaculture farmers especially for its patent formulation STERIDOL 20.

The first company to understand the need of probiotics in aquaculture introduced a special probiotic as early as 1992.

Also the very first company to identify the necessity of technical advice and support to the formers — started a full pledged Technical lab at Bhimavaram(the heart of aqua industry) in 1 991 - where the analysis of soil, water, feed, seed and diseases identification are done

We are pleased to present our inventions — which are in use for more than 1 5 years. All our products are eco friendly and residuel free.
