About Us

Micron Instruments is a light Mechanical Engineering company with over 40 years experience in the development and manufacture of high precision defence armament stores, mainly ammunition fuzes. With an ISO 9001:2008 certification, a skilled and disciplined work force of 400 employees including 50 engineers, and ample facilities to undertake development and manufacture of high precision light engineering products, Micron is ideally positioned to address emerging global manufacturing opportunities.

Micron specializes in complete mechanical manufacture covering tool design and product development, individual piece part manufacture through to assembly to complex mechanical systems. Our main customers include the Indian Ministry of Defence, various ordnance factories, Indian defence public sector undertakings and various international defence companies.

Micron has extended its product range and customer base into other industrial sectors and is supplying high precision mechanical components for medical equipment, primarily to GE Healthcare, USA, and Kyocera, Japan. The Company has also made a foray in the aerospace industry and supplies precision machined and geared parts to Moog Inc, USA, and Curtiss Wright, USA. Our strength is our flexibility and ability to respond quickly to our customers requests and fulfil their requirements. A competitive edge is maintained using modern technology and equipment, effective manufacturing systems, stringent quality management...
