## About Us

The world is experiencing a changed scenario today. The arena of education needs to witness change. Gone are the days of conventional classroom education by the teachers and cramming by the students. These days, students are more like learners. They are driven by passion and more like an overdose of creativity. Youngsters on campuses need an environment that can metaphor them into new- age Einstein's.

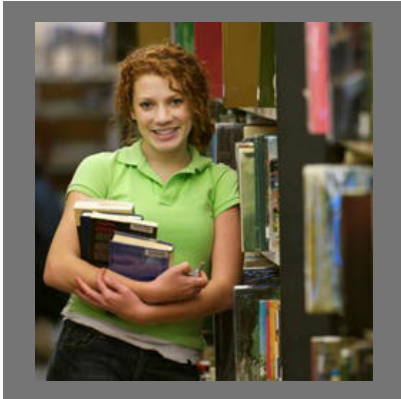

Innovation blossoms into many hues in the Garden of MM Rahmani B Ed College under M.A.Y.A charitable trust. The students are the primary beneficiaries. They are never encouraged just to mug up the words of the books and write them on the answer sheets later on. Through interactive sessions, they are made to learn and understand the basics of each and every subject so that they can rightly apply their knowledge and make a mark in their professional lives.
