We are a renowned manufacturer, trader and exporter of a wide array of transformer testing equipment and allied products. Our products are appreciated in the market for their accurate performance and longer functioning life.

## About Us

Established in the year **1991**, we, "**Monarch Controls**", are engaged in manufacturing, trading and exporting a comprehensive gamut of **Transformer Testing Equipment** and **Allied Products**. The products offered by us are highly acclaimed in the market for their extensive measuring rates, accurate results and superior performance. These products cater to the diverse requirements of organizations dealing with production or distribution of electricity. Guided by our principles of commitment, integrity and quality, we are able to expand our business activities to every corner of the world. We have developed a sound infrastructure in our unit that enables us to manufacture high quality products at a faster pace. It is supported by a team of qualified professionals, which is highly competent and possesses wide industry experience. Our company is also involved in providing consultation, manufacturing and commissioning solutions for test labs for distribution & power transformers, high voltage labs for engineering colleges and also test lab for setting up traction transformers. Besides, our transparent business dealings, optimum quality products and timely delivery services, have enabled us to supply our products to electricity boards of different states such as **Kerala and Andhra Pradesh**. Some of our leading clients are **Mico, NAL, BHEL, BEL, ISRO** and some few other power manufacturers in the **Indian...**
