## About Us

NCORD Health Card LLP, is a pioneer in healthcare technology services, enabling connectivity within healthcare stakeholders, on a 'LIVEWIRE' platform. At NCORD, we intend to solve the fundamental challenges of healthcare industry through innovative technology. Harnessing the power of innovations, we have created smart solution to reduce logistic and communication barriers between healthcare providers and seekers.

Our team shares the same vision and passion across the board. Our technology professionals, along with some of the think tanks in the healthcare sector are striving to keep the community thriving through empowerment, cost reduction and self-care concepts.

With the aim of digitizing healthcare, NCORD has developed a globally calibrated, internationally patented health record management system called "eHealthSystem". The system empowers storing and downloading of medical records anywhere and anytime. These medical records can be accessed by the patient and healthcare service providers to generate rapid response, during normal and / or emergency conditions for quick and accurate diagnosis enabling better medical care. The eHealthSystem is a unique cloud based innovative technology developed in compliance with the international laws and standards, namely HIPAA, HL7 and HITECH Act, guaranteeing security of medical data
