## About Us

NMC Industries Private Limited was started in 1949. That is how he ventured into small manufacturing activity and set up small scale unit at Wagle Estate, Distt.Thane in the year 1955. During teething and learning time he emphasis sties on quality and perfection in output and thus we develop gradually, Jigs, Fixtures, Templates & Gauges to Manufacture different of out put with quality. Thus it proved to be training center and experimental ground for better than the best result. We have full fledged plant and equipment for manufacturing of Points and Crossing, Switches and Switches Expansion Joints with complete destructive and non destructive testing lab including chemical analysis, ultrasonic testing machine, megna sound testing machines and U.T.S. testing machines to ensure quality control measure with faster and higher production output all equipment are put to running operation into our daily output.

We have team of qualified Engineers and Supervisor backed by practical experience work force to ensure quality product at every stage of its manufacturing besides which we send our personal to various trade fair and Railway joints to keep on upgrading latest technique and devices for quality control measure.We offer a wide range of railway parts that are fabricated using superior quality are material that are highly durable and have been designed as per the requirements of our esteemed clients. These parts are long lasting and are cost effective solutions...
