About Us

Omkar Engineering Works : Specialists in Spare parts of Sulzer Looms : Replacement parts for Sulzer Projectile Weaving Machine manufactured in India. Over 13 years of Experience in this field we can offer a wide product range of Unique and Patented manufacture to give textile manufactures reliable quality components at a cost effective price. OMKAR ENGINEERING WORKS was established in 1990 and is specialized in the textile field particularly in the weaving sector. We are the largest and most well-known manufacturer of Sulzer Projectile Weaving Machines Replacement Parts for Model PU, TW-11 & P-7100 in Ahmedabad. Our main profile is the manufacturing and export in spare parts for Sulzer Projectile Weaving Machines such as Picking Shoe, Picking lever, Projectile Returner, R.H slide piece, and many more. The high quality of our products, in combination with our superior after sales-service and competitive prices, has allowed us to develop a superior reputation among our global customer base. As a result, our sales volumes have steadily risen over the past several years, with each new year establishing new sales records. With a long history of achievement, we are confident in our ability to meet our customers' needs for quality. Over 13 years of Experience in this field we can offer a product range of Unique and Patented manufacture to give textile manufactures reliable quality components at a cost effective price. The components made from a special alloy steel undergo carefully...
