About Us

Today, concrete is used in variety of innovative designs because of its many valuable properties such as high compressive strength, stiffness, low thermal and electrical conductivity and low combustibility and toxicity. While other Tiles deteriorate with age, O'Tec's natural sheen actually improves over the years. Not surprising considering that O' Tec uses the richest concrete mix using Birla White cement with no trace of industrial wastes like fly ash or slag, thus eliminating the chance of structural weakness. O'tec tiles also have an extremely high compressive strength as we use the best of materials and aggregate. As such O' Tec floor & wall tile contains colors made by Bayferrox or Nuibolla. It makes O' Tec tiles more lustrous as colors look more vibrant. O'tec's complete range of floor & wall tiles is made of homogeneous mix i.e. tile is of same composition from top to bottom, unlike some other tiles which have just the top thin layer of color mix. The homogeneous mix is also the reason for O' Tec looking better and better as the years go by. The fine mesh size of materials & aggregates facilitates a polishing effect through the friction of these tiles and through regular maintenance.

We have got into technical collaboration with a European Company which has pioneered this technology. Certain exclusive characteristics of our sidewalk tiles are:

Natural Shine

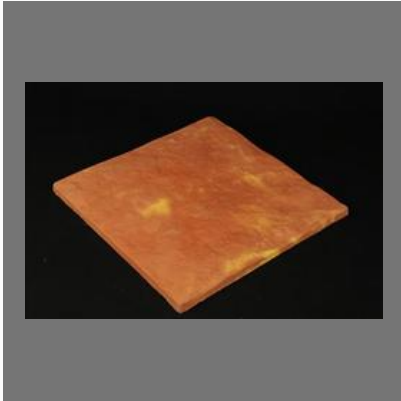

We apply no coating/varnish etc. to the finished products, thus the sheen is...
