

# Paramount Limited

<https://www.indiamart.com/paramount-limited/>

We are one of the noted service providers of Engineering as well as Consultancy Services for a wide gamut of Water Treatment Plants. Known for their easy operations and low power consumption, these plants boast of a robust construction.

## About Us

All our manufacturing processes are carried out at our well-developed manufacturing unit that is equipped with all the necessary machines and tools. Our manufacturing facilities are approved by many leading consultants based across the globe. With the help of these facilities, we provide installation services for **Tertiary Treatment of Wastewater**, which finds extensive application in cooling and feed to DM or R.O. Plant to produce water of ultra fine quality. Further, to be in sync with the latest developments of the industry, we came up with a high-tech R&D unit in the year 1976. This unit has received wide appreciation from the Department of Science and Technology (Government of India) and most of the Water Pollution Control Boards. Besides, the unit has also helped us to serve the field of **Environmental Engineering** and cater to the needs of renowned organizations such as **WORLD BANK, WHO and others**. Our organization is progressing under the able guidance of our mentors, **Mr. Samir Tuli & Mr. Pratik Patel**, who have years of industry experience. With their support, we have been able to install India's largest **Effluent Plant**, which boasts of a capacity of **36,000 m3/day**. Further, their supervision has helped us export this plant to the markets of **USA as well as Far East Countries**.
