

Planys Technologies Private Limited

<https://www.indiamart.com/planys-technologies/>

Planys Technologies is an IIT Madras incubated company that provides submersible robotic inspection and survey solutions using Remotely Operated Vehicles (ROVs). Planys indigenously designs and manufactures compact ROVs

About Us

Planys brings world class technology and cutting-edge innovations in underwater robotics and diagnostics in the shallow-mid depth segment. Planys' technology spans the domains of marine robotics, advanced Non-Destructive Evaluation (NDE), and post-inspection analysis. Planys provides a holistic service offering to customers through a design level fusion of ROV manufacture, operations and structural diagnostics. Planys is the first and currently the only OEM of ROVs in the Indian Sub-continent.

Planys was founded by IIT Madras alumni and faculty who have been working together on various projects since 2012.
