We manufacture analog AC and DC drives, battery chargers, PLC, drives, power panels and power factor control systems. We are a reseller and system integrator for all leading brands of drives and PLCs.

We deal in local market.
About Us

**Power Automation And Controls** has been serving the Indian Industry since 2002. Power Automation And Controls is owned and managed by a group of technocrats. The Management Team has long, wide and deep hands-on experience in the Industrial Automation Sector.

**Our Core Strengths are in the fields of:**

- Power Electronics
- Drives
- PLC / SCADA Systems
- Electronics Design

We produce our own indigenous range of **AC Phase Control Drives, Analog DC Drives, Large Capacity Battery Chargers, Thyristor & IGBT Firing Control circuits and Specialized Electronic Equipment** that can be custom built to suit your unique requirements. Our products are simple to use and easy to maintain. We take great pride in our products that compete with the best international brands in the field.

We are also resellers and system-integrators for a wide range of reputed brands of **PLCs, HMIs, SCADA, Drives, Motors and Switchgear.**

We also provide Design Consultancy and Trouble-shooting Services for Industrial Electronic installations and till date we have provided timely and successful solutions to all cases referred to us.

We understand the industry needs, we are flexible and responsive and we will solve your Automation challenges.

**We are looking for Local queries From Mumbai / any specific area**
