Established in 2000, Power Link Services has become the leading independent transformer repair and service facility in kerala.

## About Us

Established in 2000, Power Link Services has become the leading independent transformer repair and service facility in Kerala. We have earned an unrivaled position for ourselves due to the immense support of our prestigious customers. We take pride in the vast experience that our employees have, as well as our facility and equipment, allowing us to handle a large variety of transformers. Power Link Services has a team of transformer technicians with backgrounds in both the manufacturing and repair sectors. Our technicians are experienced in: testing, failure analysis and diagnosis, dismantling units, winding coils up to 1500 MVA, assembling oil filled and dry type transformers, various dry out methods, and processing, tapchanger and control repairs, field transformer service and new erections.
