

# Prasid Toys Private Limited

<https://www.indiamart.com/prasidtoys/>

Manufacturers of all kinds of electric toys, battery operated toys, wind up toys.

## About Us

We prefer to say that Prasad was born in 1984. Actually we started our operations as Interchip Electronics in 1984. It all began as a company designing electronic controls for process industry and slowly grew up to be a OEM manufacturer of electronic controls for the consumer durable and automotive industry. And by 1989 we were manufacturing computer keyboards for all the major computer manufacturers in India.

The year 1996 saw us diversify into electronic toys. We started off as a toy gun manufacturer. Our products were soon to break all sales records in India. But the real proud moment was to be awarded as the best toy manufacturer by the Toy Association Of India. By 1997 the name of Interchip was changed to Prasad Toys Pvt Ltd. This was now a joint stock company. And Toys was the area of focus.

We are skilled professionals with a passion for quality and a reputation for getting it right the first time. Between then and now we have collected 11 awards for making the best toys in the country.

We now make Toy Guns, Action Toys, Phone Toys, Piano Toys, Saving Banks, Friction Toys, Wind up Toys, Fancy Dolls, Tumbling Toys, Battery Operated Animals, Toy Motor and Art materials And all this happens in house

We only sell what we make. We do not trade in other products. Our marketing set up includes over 100 distributors all over the country.

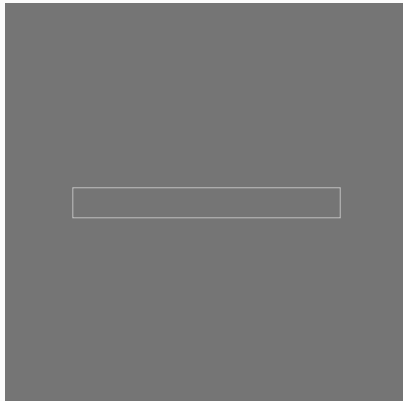

Our design lab, tool room, injection facility, blending and extrusion...
