About Us

With a production capacity in excess of the 1 million ton mark, we are India's largest producer/manufacturer of HSAW pipes - the line-pipe industry's preferred pipe. But our leadership in the pipe industry is not confined to the domestic market alone, though the market is huge and still growing - global recognition is reflected in the huge orders already in hand from the US even before the commissioning of our 300,000 MT capacity plant in Mississippi not to mention the USD 45 million order of our pipe mills in Sharjah in the UAE.
