The art of applying henna in this manner is called Mehendi, it is an ancient ritual and art form No Indian wedding is ever complete without the mehendi ceremony. Henna is a natural product. Its leaves are dried and grounded to make the henna powder. Since it is a natural product, there are no known side effects. The ritual of mehendi is followed in every part of the country where the hands of the bride are adorned with the lovely red hue of the mehendi.
