## About Us

True education lets one soar free, break new grounds...and yet retain focus on one's core personal values. Rajiv Gandhi Polytechnic has dedicated itself to this philosophy. Going beyond the confines of the classroom, beyond established curricula. Replacing mere instructions with teaching, authoritarian attitudes with friendly counselling. To give students a whole new approach to learning. An approach, which is just the right mix of tradition and modern education techniques, with a strong value system and a career oriented blueprint.
