## About Us

Rajlaxmi Minerals company was established in the year 2006. We are manufacturer and wholesaler of dolomite powder, natural minerals. The Natural Minerals are known for their purity and flawlessness. Natural Minerals are widely used in various industries for various applications. All these Natural Minerals are procured from the reliable vendors who manufacture and check the products properly. The Natural Minerals offered by us are not harmful for health. The water is pristine and completely natural mineral water. Unlike packaged water, which is chemically treated, this contains all the essential minerals naturally and has not been artificially fortified. With each sip, you will experience purity & vitality like never before. This is processed by our highly experienced professionals. It is used in detergent, plastic compound and plastic processing industries and has the following distinguishing features. In addition, these products are mostly demanded by our clients and are offered to them at reasonable prices. This Dolomite Powder is safe to use and has high melting points. Besides, this Dolomite Powder is pure in its contain and is easily available at industry leading price. The provided powder is available in various packaging options as per the demands of our esteemed clients. At our vendor's end, this powder is precisely processed using the advanced processing techniques.
