

Resonance Specialties Limited

<https://www.indiamart.com/resonance-specialties-limited/>

Manufacturer and supplier of lutidines, collidines, resonance, pyridine and cyanopyridines.

About Us

"Resonance Specialties Limited" is a pioneer in Pyridine chemistry and one of the few manufacturers of the product in the world. The company, formerly known as Armour Polymers Limited, was the first in India to manufacture Pyridines. Resonance is also one of the largest manufacturers of Lutidines in the world. Despite the fact that these technologies are available only with a select few companies worldwide, Resonance was able to innovate and commercialise production with its own technology. The company produces a range of value added products and continues to be the largest manufacturer and exporter of products like Alpha Picolinic acid and Dipicolinic acid. Resonance has exclusive supply arrangements with global industry leaders. In 1994, just two years after the commissioning of the Pyridine and Picoline plants, the company repeated its pioneering feat. It became the first company in India to manufacture Cyanopyridines. This successful effort brought company recognition from the Government of India for technological excellence. Resonance is also the first in India to manufacture various Collidines.
