About Us

RP APPARELS is a trading & sourcing company set up in 1993. We have been in China since 2001. We are supplying high quality sportswear like track jackets, track suits, jogging pants, shirts & swim shorts for FILA and involved in developing & manufacturing the same for FILA, who is one of our main buyer.

We also supply large quantities of high fashion garments for various European brands, we specialize in value added ladies clothing with embroidery treatment, spray, washing and print techniques that separate our product line from the run-of the-mill products you find elsewhere. We use hand embroidery techniques with beads and sequins and all kind of fabrics like silk, silk blends, voiles, stretch poplin, soft cottons, nets, chiffons, georgettes, jersey, viscose and cotton lycra knits etc.

Our design team is constantly gathering information from their travels, on future trends of colors in order to stay ahead of our clients need & focusing on color forecast, textures, trims and accessories. It is the attention to detail that sets us apart from our competitors. Our pattern makers are masters of their craft and have a genuine understanding of the economics of garments we manufacture. We have strong R & D team that continuously churns out new techniques, embroideries and prints that add tremendous value to the garments at affordable price.
