About Us

S. R. Engineering Industry was established in the year of 1995. We are Manufacturer of wood working machines, chain mortiser machine, mortised chain, thickness planer, rotary veneer lathe machine etc. Due to sharply escalating log and labour costs, we have intensified our research and development of advanced technology to insure maximum production at minimum costs. Our machines will give you excellent results as any of our customers will tell you.

Our team of experienced and hard working professionals is our most important asset. With their expertise and industry specific knowledge, they play a significant role in the growth of our organization. Our offered products are widely appraised among our esteemed clients for their features such as optimum strength, anti-corrosive, easy installation, superior finish and accurate dimensions. As per the detailed specifications of the patrons, these products are available in both standards and in customized options.
