About Us

We are a group of farmers that grow fruits & vegetables on less than 1 Hectare of land for you.

We are smaller than the smallest farmers and hence are called the 'Marginal Farmers' of India.

Many such like us across India together account for 63% of the total farmer population.

Before we take you what we currently do as a collective group of farmers aka 'Farmer-Producer Company (FPC)' here's a little recap from where we started :

For more information, please visit
