About Us

We are a knowledge based industrial automation and control solution and service provider. We provide custom engineered solutions with speed and reliability. These efficient and cost-effective solutions are developed using best business practices and latest technology products. Whether it is a stand-alone industrial component or an integrated system our strength lies in our ability to understand business of our customers and thus contribute in improving their market share and profitability. Our business drives its strength from the trust and faith shown by our customer in our capabilities. Our Company is into providing automation solutions to wide spectrum of industries. From taking turnkey projects including design, manufacturing, supply execution and commissioning of automation projects we have expertise to meet the demands of loose stand-alone automation markets and after sales support. We divide our profile into Services where we take care of product sales, engineering, manufacturing, supervision of erection & commissioning, training and after sales support and Application Support catering to provide optimized solution to meet the specific customer requirement.
