About Us

Edible Coconut oil is made from fully dried copra having maximum moisture content of six per cent. Copra-Milling copra is generally manufactured by adopting sun drying. Steam cooking of copra is also practiced to enhance the quality and aroma of oil. Substantial quantity of milling copra is manufactured using modern hot air driers resulting in the availability of superior quality copra which is required for the manufacture of best grade edible coconut oil. Edible coconut oil is mainly used in the manufacture of biscuits, chocolates and other confectionery items, ice cream and pharmaceutical products. Generally, filtered coconut oil is used for cooking and toiletry purposes.
