About Us

we firmly commit to providing our clients with the best service possible. To meet that commitment, our business strategy is multi-faceted and thorough. From the very first contact, where we discuss your needs and requirements, to ongoing evaluation and review, your complete satisfaction is our goal. Our process begins with an initial on-site analysis which allows us to establish key performance indicators. They provide us with an in-depth understanding of your organizational structure, culture, habits and behaviours, and allow us the insight to establish a level of security specific to the needs of your organization. SAR Security partners with you through every stage of your project, acting as both consultant and colleague. A comprehensive approach is taken in the development of the duties, responsibilities and expected performance levels of the security guards assigned to your facility. With the aid of our computerized scheduling database, we match each security guard profile with your specific client specifications. This approach further enhances your investment in us and in your facilities. We believe that our security professionals are the finest in the business and we adhere to a stringent selection protocol. Applicants undergo rigorous screening and interviewing. Only those who exhibit extensive technical and professional development training are considered to be part of the SAR team.
