## About Us

Since the year of its establishment, 2002, the people at Satguru Refractories have profoundly put dedicated efforts to reach their destination of technical excellence & technological expertise in the field of refractories. Being awarded the status of an ISO 9001:2000 company is the toughened proof of its quality management & customer satisfaction. The Satguru Refractories range of products and services extends from refractory raw materials like Calcined Bauxite, Chromite, Additives, Resins & Mass Usage Products like ramming mass to special tailor made products like Well Filler Mass, Tap-hole clay, Mould Coating Compound, Mould Sealing Compound, etc that are specially manufactured for various steel plants throughout Indian subcontinent.

The strength of our competence in full technologies flow into the development of innovative processes that are developed at our state of art laboratories enabling us to produce the ISO standard products at lower costs that match to the customer requirements.

Our production facility situated at Bhilai is well equipped with optimally adapted & efficiently automated systems for economical processes, which at the same time fulfill the most accurate demands for high quality products. These activities also result in innovative products for new applications commencing at various work sites.

With the background of massive production development & changes, Satguru Refractories aims at providing its clients with the...
