

Sharp Electronics Technologies

<https://www.indiamart.com/sharp-electronics-technologies/>

We are a one of the renowned proprietorship firm engaged in manufacturing and supplying different types of Weighing Instruments. These instruments are known for their accurate functionality, light weight and energy saving features.

About Us

Established in the **year 1995**, we, “**Alfa Systems, Mumbai**”, have established as a well known manufacturer and supplier of **Weighing Instruments**. These instruments are designed and manufactured by experienced professionals and are highly appreciated for their accuracy, attractive design, robust construction and longer durability. We give utmost priority to clients satisfaction, hence we deliver our product in different sizes, shapes and specifications as per the requirements of the clients. The use of high quality raw material procured from the trusted vendors of the market is used in the manufacturing process. To deliver flawless range of products, we check the quality at every stage of manufacturing using latest testing methodologies. The instruments are tested on the basis of their accuracy in weighing and in detecting fake currency. After being satisfied with our product quality, we dispatch these in the market. We provide these to the customers at cost-effective rates compared to similar items available in the market. Under the proficient guidance of our mentor, “**Mr. Pankaj Kore**”, we have been successful to achieve a remarkable position in the market. He is responsible for the growth of the organization. His domain expertise, client-centric approach and experience in the business have always motivated us to offer the products with par excellence and cost-effectiveness.
