## About Us

Sreemudranalaya Technology Private Limited (SMTPL) registered under the Companies Act 1956 established in the year of 2006 as a diversification attempt to enter the hugely untapped IT & ITeS market. In order to ensure quality deliverables the company has set up its own in-house data processing centers in Kolkata and has slowly expanded the same in various other locations all over the country. The company operations are managed by a dedicated and motivated team of experienced staff who are capable of delivering services in lines with customer requirements using state-of-the-art technology.

The strength of an organisation depends on collective knowledge and its sharing of that knowledge and experience with others. SMTPL has a team of dedicated resources ranging from Data Entry Operators to Project Supervisors, Technical Specialists and Program Managers on its own rolls. This allows it to rapidly deploy its resources as and where required. The technical team is equipped with sufficient spares to handle any technical support issue now in the field of spatial management which includes GIS, GPS and RS etc.
