About Us

Decades ago, a single-minded vision of innovating and producing products critical to global healthcare took shape. Today, it is acknowledged as Shree Raj Chem. Serving the society with best-in-class pharmaceutical solutions since past 28 years, Shree Raj Chem has been founded on the pillars of quality, innovation, excellence and value for money.

The beginning was slow, but steady. We started out with a few products including glycerin and Sorbitol. But as the team multiplied and opportunities increased manifold, it allowed us to explore, innovate and create something magical. Today, we stock more than 50 products in our warehouse. We are one of leading suppliers of APIs, Nutraceuticals and Excipients not only to Indian pharmaceutical companies operating on small and medium scale but also cater to many multinational pharmaceutical companies. A few years ago, we had almost witnessed the monopoly in selling 20 million tonnes of Vitamin C, one of the major products we have on offer.
