## About Us

Young India needs its youth skilled and Shri Technologies is trying to address the need in its own way by contributing its part. We are registered as a training and development company in 2008. We thrive to build the skill for the weaker sections. We tailor make curriculum combining it with local hands on projects making it efficient and yet affordable for the Bottom of pyramid. Our major focus in on the age group of 18-35 years, because our research found that it is in this age that one needs to be put on work track in order to make them count for the nation as a qualified work force. We believe strongly that a nation is only as strong as its citizens are. Our emphasis rests on building youth who build India in their word and deed.
