Goodpack, a Singapore homegrown company provides a patented unique packaging alternative for bulk cargo to replace wooden boxes and metal drums for cost and environmental advantages

## About Us

Goodpack, a Singapore homegrown company provides a patented unique packaging alternative for bulk cargo to replace wooden boxes and metal drums for cost and environmental advantages. We are a global company providing cost leading, innovative and creative IBC (Intermediate Bulk Container) supply chain solutions. We own and operate the world's largest fleet of over 2.6 million steel IBCs, each of which can hold 1.5 tons of goods, leased to MNCs in diverse industries including the rubber and tire, food and chemical industries. With the IBC's returnable system, Goodpack is riding on the global environmental trend for waste minimization, unlike disposable packaging such as wooden pallets, paper cartons and single-use steel drums. The recent International Phytosanitary Measure ("ISPM-15") regulation developed by the International Plant Protection Convention ("IPPC") also requires wood packaging material to be heat-treated or fumigated to prevent the the infestation of larva. Based on the number of customers who have switched from wood to Goodpack IBC packaging. It is estimated this amounts to a saving of more than 1 million tons of wood, worth approximately US\$840 million. The Goodpack IBC is environmentally friendly and fully recyclable with an average usable life of 16 to 20 years. At the end of its life cycle it can be scrapped...
