About Us

SMODI INFRASTEEL PVT. LTD., is instituted by an individual professional over 25 years of Engineering & professional experience in the field of new business development, positioning, branding, project management and excellent customer relationship. A team of similar minds having reach experience from different expertise in Pre-Engineered steel building system and Heavy steel structure used for Infrastructure projects, industrial, warehousing and various other applications came together to form this company as team based organization then owner based . Objective behind this establishment is to provide end to end solution to the customer by proper education, training & guidance so that customer should opt for right and professional vendor at optimal price rather than economical vendor with the poor quality product at the end. Company offer wide range of solution such as Project physibile study, concept suggestion, Architectural solution & suggestion, Project Management consultancy service, design & engineering, supply & installation of Pre-Engineered steel building system & heavy steel structure as an efficient systems then just a product. Our motto is to deliver **satisfactory services at all the time** rather than just a project delivery.
