Ltd.**

" are a Proprietorship based firm,

## About Us

**We are India's Leading Manufacturer and Service Provider for home automation and Smart Wi fi Electrical Products.**

We are the engineers of this generation. Our workspace provides a collaborative and progressive environment, which is represented in our products, principles, and ethics. We're continually working to improve the quality and durability of our end-user goods, which saves money for consumers. In our company, research and development is a never-ending process It's the project's foundation. Our team creates a prototype of cutting-edge and one-of-a-kind items using a combination of hardware and software. We get the production/multiplication of this hardware done in a third-party factory in India after we get satisfactory regress testing and clearances. The majority of the components in our products are proudly 'Made in India.' After production, our team of engineers performs quality control and firmware updates, which are subsequently incorporated into people's homes, mobile devices, and daily lives, making their homes and lives smarter.

We discovered in late 2016 that consumers frequently leave their electrical appliances turned on when they go for work. It happened to others of our family and friends as well, when the geyser & lights switched on as they were leaving for work. We became aware of the problems and wondered whether we might turn off the appliances from anywhere outside the...
