MADHURA AGRO PROCESS PRIVATE LIMITED

<https://www.indiamart.com/solar-energy-co/>

To establish a regular business for farmers without increasing consumer price, so as to build farmer fortunes as well as introduce a wide range of healthy consumables with convenience to consumers.

About Us

Why COCOFRESH??

The water of tender coconut, technically liquid endosperm, is a wholesome beverage for people of all age groups and is becoming popular day by day amongst sportsmen, health-conscious people, yoga enthusiasts, pregnant & lactating mothers and young children. With a delicate aroma and taste, it has all the functional characteristics of a health, sports & energy drink. Called 'Water of Life', the tender coconut has been a life giver for centuries, having been used as intravenous fluid, treatment for urinary tract infection, and several medical applications. However, tender coconut water has traditionally been consumed directly from its shell, and has for long been the most difficult drink to preserve and package.. UNTIL NOW.
