About Us

With the world moving towards CLEAN & GREEN ENERGY, integrating sustainable systems with energy efficiency is the need of the hour. Spray Engineering Devices Limited (SED) is 'Dedicated for Sustainable Environment Development to Unlock Perpetual Food and Energy Resources'.

Established by Mr. Vivek Verma in 1992 from a modest start of manufacturing of spray nozzles, SED today has established its existence in more than 38 countries, providing Innovative Technological Solutions to Sugar & Allied Industries. SED offers integrated energy efficient, cost effective turnkey solution for Sugar Sector having specialization in Evaporation, Crystallization, Refining and Cooling & Condensing System. Development and Implementation of innovative ideas & technologies through energy efficient engineering has given credence to SED. SED has identified several potential areas for energy conservation of sugar & allied industries to achieve increased productivity at reduced costs with optimum utilization of resources. The steam consumption of sugar industry has been achieved up to 27-28% on cane using SED's innovative technologies, equipment and solutions. It is possible with 15-20% steam consumption by using current efficient equipment & technologies and further reduction is possible. The power (40 kW/Ton) consumption has been reduced up to 22-24 kW/Ton of cane and factory has been managed to operate with Zero Fresh Water requirement.

OTHER PRODUCTS

EPC Solution System

Industrial Plant Automation

Sheet Metal Fabrication

Equipment Design

OTHER PRODUCTS:

Equipment Manufacturing

Direct Contact Heater

Molasses Conditioner

Tabular Falling Film
Evaporator

OTHER PRODUCTS:

Sugar Melter

Spray Continuous Pan

Cooling And Condensing Systems

Liquid Jet Ejectors

Factsheet

Nature of Business

:Manufacturer
