Sri Akshay Engineering works is one of the leading organizations in the field of industrial automation. Since its inception in **2006**, it has cut out a niche for itself, as a solution provider in various segments of the process .

About Us

Sri Akshay Engineering works is one of the leading organizations in the field of industrial automation and offer Machine Retrofitting and Chint Electricals. The product range include Machine Retrofitted, Horizontal Bending Machine and Straightening Machine. Since its inception in **2006**, it has cut out a niche for itself, as a solution provider in various segments of the process and manufacturing industry, both in India.

As the biggest experienced team in Maharashtra, we have in some way or the other been associated with major automation projects in the automotive, sugar, cement, steel, paper, pharmaceuticals, packaging, machine tools, chemical, vegetable oil & SPM manufacturing industries in various states around the globe. A very high degree of technical skill and expertise has been acquired by us over the last one and half decade and today with a team of around 20 skilled engineers and technicians at our disposal, we are in a position to take up the most sophisticated challenges coming up in the automation industry.

Under the continuous assistance of our mentors **Mr. Tavse G. V.**, we have gained immense appreciation from our client base. We are increasing our reach day by day because their valuable supervision.
