About Us

Our Company is established by a group of Engineers having well experience on instrumentation and mechanical decipline over the past few decades. The wealth of knowlege we haveenable us to engineer and design our products to meet the customer's requirement with quality and price. With our experience and alliance with various multinational companies we cancustomise our product to meet the customer's requirment.

We are expertise on Cell phone based Building Security System, Cell phone based Vehicle Security System, Remote Monitoring and Control of any electrical equipment using CellPhones and Data loggers/modem using GPRS system.

We have programmed and tested our products vigoursly to ensure that it achieves various functionality of current market requirement with high realiability. Most of our products do not requireanymore cabling which enable our cusotmers to easily install without demolising the existing setup to lay cables.

Our prime focus is to bring the Technology to everyone's door step to make the customer to feel comfortable in terms of not only the functionality also the price paying for the solution.
