# Steel Smith

<https://www.indiamart.com/steelsmiththane/>

Manufacturer and exporter of pneumatic, hydraulic swing, manual toggle clamps, jigs and fixtures for machine tools.

## About Us

teel Smith pioneered the development of toggle clamps in India over 40 years ago and still manufactures the country's widest and most recognized line of these useful and adaptable tools. From conceptualization to execution, from drawing to production, there's just one single largest force that drives us, our customer. He was with us when we first ventured into the uncharted area of toggle clamp manufacturing in India. Four decades later, he still looks up to us with the same trust he began with. Because even as the times changed along with the application areas our products kept pace. Only improving in terms of quality.
