## About Us

Early childhood refers to the first six years of life. This is acknowledged as the most crucial period, when the rate of development is very high and foundations are laid for cumulative lifelong learning and human development. There is growing scientific evidence that the development of the brain in the early years is a pathway that affects physical and mental health, learning and behaviour throughout the life cycle. Preschool curriculum has a significant impact during the child's early developmental years. It is this segment of Early Childhood Learning and Development that Strawberry Play School play school caters to . Play school education is a phase of introducing children to fundamental learning through the use of a medium that is engaging, less straining and more recreational in nature. We, at Strawberry Play School, realise that the child's time spent with us is vital to initiate his/her intellectual and spiritual growth. We make a sincere effort in ensuring that the quality of Pre-school Education is upheld through employing experienced Teachers & innovative teaching aids. We pride ourselves on the fact that within a span of 4 years we have grown from a sapling to a big tree. However, we have made sure that our expansion hasn't come at the cost of making compromises on the quality of our Play school programme and this is what has helped achieve an enviable reputation.
