## About Us

Our company Sunrise Infotech was established in the year of 2001 in Mumbai. In the beginning it was the founder's vision to be a part of the booming IT industry. At the time of its establishment, the company was distributing products from Seagate, IBM, Transcend, SanDisk, HP, Kingston, Hynix etc. Prompted by it's success in its Mumbai operation, the company was ready to foray in to other Metro markets and widen it's reach. Currently the company has branch in Bangalore.

Customer relationship: We have always emphasized on keeping the customers happy by our service, delivery, warranty claims, replacement etc. At times we have preferred bearing the losses by immediate replacement of the products. We have the executives, who have been made to understand the value of customers and need to understand their requirements. Our executives will always be putting their best efforts to keep the customers free of worries related to compatibility, warranty problems, etc.
