About Us

We are one of the front ending Indian infrastructure construction, development and management companies in the country, with wide experience and proven expertise in the execution of major infrastructure projects, including highways, bridges, flyovers, power transmission lines, airport runways, industrial area development and other infrastructure activities with an established track record of successful execution of projects across sectors and geographies.

We provide end-to-end infrastructure implementation solutions that include engineering, procurement and construction ("EPC") services on a fixed-sum turnkey basis as well as on an item rate basis. We also execute and implement projects on a "Design-Build- Finance-Operate-Transfer" ("DBFOT"), Operate-Maintain-Transfer ("OMT") and other PPP formats. We are one of the very few infrastructure companies in the country that have proven investment, development, construction and management capabilities.
