IOT Projects [IOT WEB PAGE + PHP CODE + MYSQL DATABASE] (RASPBERRY Pi/ Arduino /8051 / AVR / MSP430 / ARM7).

IOT Projects on Raspberry Pi | ESP8266 | Wi-Fi | Arduino | Home Assistant | GPRS |HTTP | MQTT | NodeMcu |

About Us

SVSEMBEDDED is professionally Designed for Embedded systems in Design, Development, Training, Research & Developments. SVSEMBEDDED is a technical organization engaged in developing software, hardware and automation products for the Industries & provides the latest technologies to Manufacturers for their growth. Apart from the projects for the Industries, we have developed certain development boards and tools, useful for Development engineers, engineering institutions, R&D organizations, and manufacturers. We also stock different types of device programmers, sensors, hard to find electronic components, and instruments. SVSEMBEDDED is also helps Students to innovate their Ideas & build project for their final year from various streams (Electronics, Telecommunications, Instrumentation, Diploma, Bio-Medical, Computers).

SVSEMBEDDED Have Wide Range of projects as follows:-

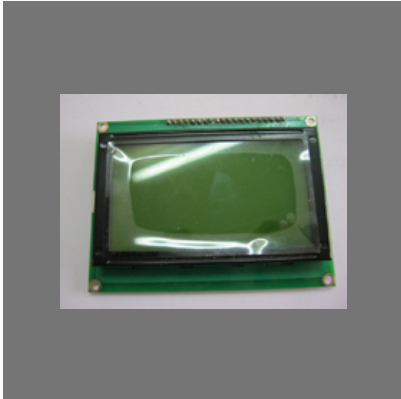

- Electronics projects.
- Electrical Projects.
- Microcontroller Projects.
- Bio-medical Projects.
- Robotic Projects.
- Communication based projects.

OTHER PRODUCTS

Graphic LCD Module 128x64

Svembedded-- Pick N Place
Robotic Arm And Movement
Controlled

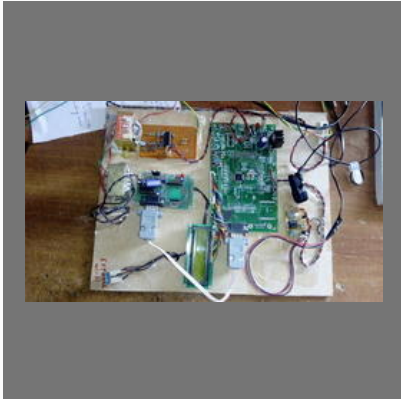

Smart GPS Patch Antenna
Module Rasta-P-634 R

Arduino Uno R3 Board With
Dip Atmega328p

OTHER PRODUCTS:

WiFi Based Personal Health Monitoring System Using Android - ESP8266 Module

Wireless Bluetooth Based Smart Home Control System

RF-ID 125khz Reader Module

Factsheet

Year of Establishment : 2010

Nature of Business : Manufacturer

Total Number of Employees : Upto 10 People
