## About Us

We are an Oklahoma SEO, (search engine optimization), firm located in Oklahoma City. We generate traffic from searches done in major search engines like Google, Yahoo and Bing. If someone needs to find a brain injury lawyer in Tulsa, we put you at the top for that search!

We focus on organic listings in search engines,(you know - the free ones), because studies show that over 70% of all traffic goes to the top 10 results in the center of the page.

That is not to discount Pay Per Click advertising. There is no question that if you want to be found for a specific search phrase the next day, PPC is the way to do it. We manage and monitor PPC accounts like Google Adwords for any size budget.

Finally, placement in search engines are worth nothing if they do not convert into info requests that get you cases. That is why we offer a unique live chat program that virtually guarantees quality leads within ethical guidelines set by you.

The secret to top search engine placement is - There is no secret. It is just a matter of experience to know what to do, then rolling up your sleeves and doing the work. We don't have any magic tricks.

We don't have a friends that work at any search engine. We have just learned what needs to be done by doing it for a decade now.

The formula for success with search engines is a simple three step process:

Add original content that is focused on a highly targeted set of keywords; such as Tulsa divorce lawyer for example.
