## About Us

Thakkar & associates is an uncompromisingly modern, design focused practice based in Mumbai. Founded in 1975 by Architects Harish Thakkar and Hemant Thakkar, the firm has completed a vast variety of projects ranging from an accessories store in up market Manhattan to a home in South Mumbai, from shopping malls and retail stores pan-India to penthouses on the Kolkata skyline. Our process oriented practice begins by taking a concept/an idea and developing it to meet our client's expectations. Our principal aim is to provide our clients with original design solutions that will add value to the project space. We use innovative methods to break the mould all the while giving utmost importance to quality control standards and attention to detail to ensure that we deliver our best.

Our experience gives us an in depth understanding of retail design principles enabling us to create practical solutions for our clients. Environmental awareness and effective space planning use of sustainable materials and energy efficient design, add to the value of the solutions provided by us. Our strong communication skills within the organizations as well as the great rapport that we develop with our clients help us understand the most fundamental of questions. 'What exactly does the client need?' This is reiterated by the fact that over 60% of our business is from existing clients.
