## About Us

The journey of time leaves behind its footprints not only on our intangible mind, but also the tangible assets we possess and hold close to heart. While the cherished moments usher in joy and give way to nostalgic indulgence of pleasant memories, the scars due to passage of time, corrosion or accidents invite embarrassment, affect productivity, and even lead to closure of business. It hence becomes imperative for properties to opt for construction intervention.

At Ushta Infinity, we regard the concept of construction intervention as an art, where each of our expert and diligent team members is an artist, and each project a masterpiece.
