## About Us

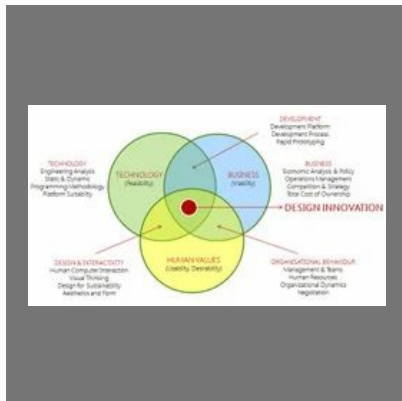

At VBSOFT, we believe the answer to the biggest problems lies in the simplest of solutions. Precise analysis holds the key. That is why our proficient team follows a stage-by-stage procedure for any solution starting from a thorough problem analysis. What follows is extensive research based on which we generate multiple ideas catering to the business needs of the customer. After the best idea is selected, an activity mapping is done followed by final execution and consistency check-up. At VBSOFT, we realise the significance of time and give utmost importance to timely execution. At the same time, we believe in always thriving for the quest to deliver 'Nothing but the best' for the tiniest of assignments. Established in June 2000, VBSOFT started with a vision to deliver unmatched value to our clients, with unflinching adherence to highest standards of ethics, quality, delivery cycle time & service orientation. Since inception, we focused on developing integrated web based software solutions and delivering ITS consultancy services. In course of time, we have enriched our technical expertise through continual process of R&D and innovation and blended it with uncompromising dedication to customers. With the foresight to look ahead at technology trends and the insight to keep our customers remain in sync with latest technology; the company maintains a strong and flexible synergy, thereby fostering sustained organic growth both in terms of numbers and in the areas of...
