About Us

Forces, torque and motions are the centrifugal elements that enable mechanical equipment to do useful work. However, even in the most carefully designed equipment, these very elements tend to produce undesirable effects such as vibration, shock and noise disturbances. These forces if not properly controlled not only ensure a premature failure of components but also adversely affect the comfort, safety and performance of equipment.

The products such as anti vibration mounts, machine isolation vibration mounts and other rubber mounts manufactured by VIBRATEK will enhance the quality of your equipment by ensuring a smooth, quiet and less disturbing operation. Our endeavor is to provide cost effective solutions to increase your equipment life by ensuring that the components are less susceptible to failure.

The founders and management of VIBRATEK have over 17 years of combined experience in the manufacturing of springs, anti-vibration mounts, rubber mounts, rubber and metal to rubber bonded products and customized rubber products. We are proud of the quality, workmanship, and ethical & moral standards we bring into our business ventures.

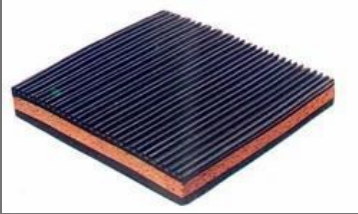

VIBRATEK was started in 1992 as a family venture. Over the years, we have gained the respect and trust of our clients through our dedication, perseverance and insatiable desire to strive for perfection. In order to help our customers identify the product they require for individual applications, necessary...
