About Us

VinChip Systems was founded to fill the design productivity gap brought about by advances in semiconductor manufacturing and reducing product life cycles. Now, OEMs are provided with an opportunity to design an entire system on a chip leading to reduced cost and increased reliability. But, they also face the prospect of designing products whose design and development cycle matches the products' life cycle and in some cases outstrip the life cycle.

VinChip recognized the role of silicon proven Intellectual property cores and Design services in the current scenario and has brought in a team of design experts and domain experts with wide experience in developing solutions for Computing, Networking, Consumer electronics, Embedded systems, Avionics and Industrial systems. VinChip's current focus is on developing IPs for USB3.0, Wireless USB, Mboa Mac, H.264 (MPEG4/part10), and USB2.0, AHB to PCI Bridge, 32-bit RISC CPU and Bluetooth along with associated software stacks and provides design services. VinChip offers substantial cost savings to its customers by providing proven IPs and design services o
